

Cameron's Valves & Measurement group is a leading provider of valve and measurement products, systems and services used in oil and gas production, transportation and refining. The group is an integral part of Cameron's flow equipment leadership in oil, gas, and other process markets.

We offer competitive salaries, Company paid benefit and pension plans, training opportunities, and career advancement.

We are currently recruiting an enthusiastic individual to be based in our Edmonton facility for the position of:

PRODUCTION PLANNER

GENERAL DUTIES AND RESPONSIBILITIES

- Schedules the production of manufactured product for delivery to customer.
- Communicates with inside sales, outside sales and/or project management to clearly define order requirements.
- Routes manufacturing orders in accordance with sales order requirements.
- Inputs and maintain orders accurately in SAP.
- Initiates and follows through with 6 Sigma improvement projects.

All activities support the plant objective of improving on-time delivery and inventory turns.

QUALIFICATIONS

- High school diploma or GED
- Post secondary education within business/engineering/supply chain management or APICS certification.
- 3 years experience working within a manufacturing environment.
- Experience with SAP, lean manufacturing and Six Sigma is an asset.
- Experience in oilfield equipment/parts is desired.

We invite you to forward your resume & covering letter to jobedge@c-a-m.com, quoting "Production Planner" in the subject title.

Cameron thanks all applicants, however, only those candidates selected for interview will be contacted.
